This checklist reflects Command requirements for Civil Engineer units to prepare for and conduct internal reviews.

1. References have been provided for each critical item. Critical items have been kept to a minimum and are related to public law, safety, security, fiscal responsibility, and/or mission accomplishment. While compliance with non-critical items is not rated, these items help gauge the effectiveness/efficiency of the function.
2. This publication establishes a baseline checklist. The checklist will also be used by the Command IG during applicable assessments. Use the checklist at **Attachment 1** as a guide only. Add to or modify each area as needed, but not less stringent than the specified reference, to ensure an effective and thorough review of the unit Nuclear Surety For Explosive Ordnance Disposal program.
